#### **Work experience**

May 2021 – August      ICT Attache – University of Eldoret

- Employ best coding practices techniques to work on a software development project.
- Work as a part of 3-member team to develop a mobile application with kotlin that was part of the program in the company.
- Obtain a solid understanding of application development by creating, testing and deploying application.
- Able to create a back-end application with nodejs and postgres as part of the team project.

#### **Education**

Sep 2017 – 2022 - Taita Taveta University (Bachelor of science in Information Technology)

April 2022 – up to date - Moringa School, Nairobi (Software development for android development)

In the 6 month of learning , I did several independent projects and group projects.

- On group projects I lead the group on achieving requirements of project as the scrum master.
- On independent projects I ensured all requirements of the tasks are met.
- Did testing on the projects and ensure quality of code.

#### **Additional information**

I have an interest in Android Development. I am currently on track learning it.

#### **Personal Interests**

- Watching tech documentaries.

#### **Referees**
